Professional Summary

Fourth-year Information Science Engineering student with strong foundations in Java, Data Structures and Algorithms, Full Stack Development, Database Management Systems, and Object-Oriented Programming. Experienced in developing web applications, backend systems, and data-driven solutions through academic projects and a DRDO internship. Passionate about building scalable software, solving real-world problems, and continuously improving through hands-on development, competitive projects, and collaborative engineering environments.

Technical Skills

Languages: Java • Python • C • JavaScript

Frontend: HTML • CSS • React.js

Backend: Node.js • Express.js • PHP • REST APIs

Databases: MySQL • MongoDB • SQLite

Tools: Git • GitHub • VS Code • Postman

Core CS: DSA • OOP • DBMS • OS • CN • Software Engineering

Education

Atria Institute of Technology, Bengaluru

2023–2027

B.E. Information Science Engineering — CGPA: 8.2/10

Relevant Coursework: DSA, OOP, DBMS, OS, CN, Software Engineering

Internship Experience

Web Development Intern (PHP & MySQL)

Microwave Tube Research & Development Centre (MTRDC), DRDO, Bengaluru

Aug 2025

- Developed backend modules using PHP and MySQL for internal web applications.
- Implemented CRUD operations, authentication, SQL optimization, testing, and debugging.
- Collaborated with engineers in an RD environment, strengthening backend development and problem-solving skills.

Technical Projects

Smart Hydroponic Monitoring System

GitHub

Python — IoT — Sensors — Microcontroller

- Developed an IoT-based monitoring system to automate plant growth management using real-time environmental data.
- Integrated sensors to monitor water level, temperature, and nutrient concentration for continuous system monitoring.
- Presented the project at the VTU Tech Fest, demonstrating practical problem-solving through embedded systems.

Personalized Book Recommendation System

GitHub

Python — Scikit-learn — Pandas

- Developed a machine learning-based recommendation engine using collaborative filtering techniques.
- Processed datasets using Pandas and Scikit-learn to improve recommendation accuracy and personalization.
- Built a user-friendly interface to generate personalized book recommendations based on user preferences.

Achievements & Certifications

- Selected for Web Development Internship at DRDO.
- Winner – UXVERSE UI Design Competition.
- Participant – Smart India Hackathon (SIH) 2024.
- Google Student Ambassador.
- Software Engineering, DevOps Fundamentals, Programming in C – Infosys Springboard.

Leadership & Activities

- Google Student Ambassador – Conduct workshops and technical sessions on Google Gemini.
- Volunteer – Project Chittoor (80+ hours) teaching mathematics to rural students.
